

Environmental Policy

BACTEC International Limited has a total respect for our environment. We, our employees and others who work for us directly, or on a contract or sub-contract basis, will work to minimise waste, prevent pollution and conserve energy.

All materials and wastes will be handled in strict compliance with all relevant requirements including: storage, labelling, use, disposal, reporting, training and record-keeping.

In ensuring that these objectives are met BACTEC International Limited are committed to:

- Ensuring that all legislative requirements are identified and met
- Implementing a continuous programme of environmental improvements through an annual process of setting closely monitored objectives and targets
- Maintaining systems, which address the requirements of ISO 14001
- Promoting environmental awareness through training and education and communicating our objectives to all our employees and others who may work for us
- Reducing waste and energy consumption
- Applying the best practicable means to reduce emissions to air, land and water caused by our activities
- Including environmental considerations in all business decisions
- Developing relationships with our suppliers that emphasise continuous improvement in environmental performance
- Monitoring our environmental performance by regular auditing of the activities of the organisation
- Making this Policy publicly available
- Formally review, and update this Policy as necessary, on an annual basis
