BombRisk, the instant, online system, developed by BACTEC and F!ND maps

INSTANT – Online Automated Preliminary UXO Risk Assessment Report £175 + vat

A detailed summary of potential UXO risk to your site

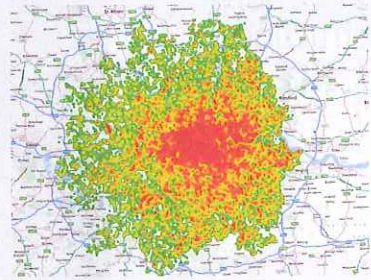

Based on 19 datasets, each assessment analyses over 100 geospatial databases of UXO threats.

Accurate: BACTEC has since 1991 collated data from more than 3000 UXO risk projects in the UK.

Fast: Preliminary UXO Risk Assessment Report downloaded instantly to you.

Effective: Reliable data allows you to make a timely, informed decision on a potential UXO risk to your site.

- BombRisk report - as recommended for Stage 1 of CIRIA C681.
- If a detailed UXO Risk Assessment Report is recommended, cost of the preliminary report is refunded.
