

Environmental Policy

BACTEC International Limited recognises the importance of environmental management and is working to minimise waste, prevent pollution and conserve energy.

We are committed to continuously benchmarking and enhancing our environmental performance and aim to set, monitor and review our objectives and targets on an ongoing basis.

In ensuring that these objectives are met BACTEC International Limited are committed to:

1. Ensuring that we remain compliant with all applicable legislative requirements
2. Maintaining an efficient integrated management system, which addresses the requirements of the ISO Standards.
3. Promoting environmental awareness through training and education and communicating our objectives to all our employees , business associates and other stakeholders.
4. Reducing waste and energy consumption through our reduce, reuse and recycle philosophy.
5. Aiming to reduce the emissions to air, land and water caused by our activities and strive to increase our use of energy sources and technologies with lower emissions.
6. Including environmental considerations in our business planning and decision making process.
7. Developing relationships with our suppliers that emphasise continuous improvement in their environmental performance
8. Monitoring our environmental performance by regular auditing of the activities of the organisation
9. Formally reviewing and updating this Policy as necessary, on an annual basis to ensure the continued applicability.
